VAN JASON CREWS

Summary

Problem-solving professional with a well-rounded background in the information technology field. IT professional looking to change directions in career. A team player who strives for good communication, solid attention to detail and positive resolution to issues.

Experience

University of South Florida Software Engineering Bootcamp
Student

700+ hours of hands-on course material, with 1:1 industry expert mentor oversight, and completion of 4 in-depth portfolio projects. Mastered skills in front-end web development, back-end web development, databases, and data structures and algorithms.

Projects

Jeopardy!

Jeopardy! is one of the longest-running game shows in American history. It has been running for 36 years, and contestants have earned millions of dollars since it first aired. Ken Jennings alone won 2.5 million dollars on his historic 74 game hot streak. For trivia nerds out there, it is possibly the best game show ever created.

This app is a functioning interactive game of Jeopardy!

Connect Four

Connect Four is played on a grid, 7 wide by 6 deep, with two players, 1 (red) and 2 (blue). The players alternate turns, dropping a piece of their color in the top of a column. The piece will fall down to the further-down unoccupied slot.

The game is won when a player makes four in a row (horizontally, vertically, or diagonally). The game is a tie if the entire board fills up without a winner.

Hacker News

A news-aggregator site (based loosely on a popular one called Hacker News). It will allow users to create accounts, log in, create articles, mark articles as favorites, and more!

Spotify Premium Companion App

This application works directly with a user's Spotify account. After signing in with Spotify, the application gives detailed information about the Spotify experience, such as play history, favorite Artist, playlists and much more. You can stream your Spotify tracks on the app with the Web Player and also play local files with the Local Player.
